	Steps	Tasks	Status
1	Design Data Architecture	Choose Data Management Approach	Complete
2	Design Data Architecture	Design the Layers	Complete
3	Design Data Architecture	Doc: Draw Data Architecture	Complete
4			
5	Data Initialization	Create a Git Repo & Prepare The Repo Structure	Complete
6	Data Initialization	Create Database & Schemas	Complete
7			
8	Bronze Layer	**Analysing**: Analysing Source System	Complete
9	Bronze Layer	**AWS**: Create S3 bucket, IAM user and access key on AWS	Complete
10	Bronze Layer	**Coding**: Data Ingestion (Extract & Load)	Complete
11	Bronze Layer	**Validating:** Testing Validation & Completeness	Complete
12	Bronze Layer	Commit Code in Git Repo	Complete
13			
14	Build Silver Layer	**Analysing**: Explore & Understand the data	Complete
15	Buil Silver Layer	**Doc**: Draw Integration Model	Complete
16	Build Silver Layer	**Coding**: Data Cleaning & Inserting into Silver	Complete
17	Build Silver Layer	**Coding & AWS:** Load proccesed data into S3	Complete
18	Build Silver Layer	**Validating**: Testing Validation & Correctness	Complete
19	Build Silver Layer	Commit Code in Git Repo	Complete
20			
21	Build Gold Layer	**Coding**: Data Integration	Complete
22	Build Gold Layer	**Doc:** Draw Star Schema Data Modelling	Complete
23	Build Gold Layer	**Doc:** Create Data Catalog	Complete
24	Build Gold Layer	Commit Code in Git Repo	Complete
